
Ride Booking Analytics

A comprehensive data analysis project uncovering rider behavior, demand patterns, and pricing insights — using Python and Power BI.

Made with GAMMA

Key Findings at a Glance

⏰ Peak Hours

8 AM & 7 PM commute surges

📅 Busiest Days

Friday & Saturday lead demand

🚗 Top Service

'Go' economy: 60% of all rides

💰 Pricing

Strong distance–fare correlation

Made with GAMMA

Project Objectives

- Peak hours & days
- Most & least popular car types
- Distance, duration & fare relationship
- Geographic pickup distribution
- Static report + interactive dashboard

Made with GAMMA

Data & Methodology

Dataset

20 synthetic ride records via Excel

- Ride ID, Date/Time, Locations
- Distance, Duration, Fare, Car Type
- Payment Type, Rider Rating

Tools

Excel

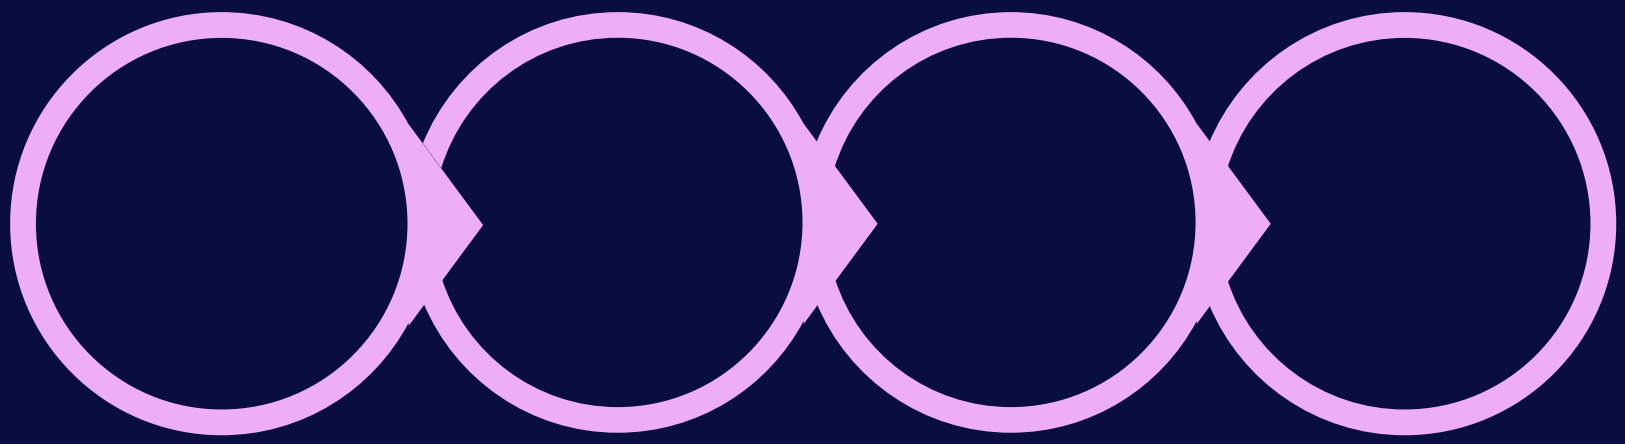
Data storage

Python

Cleaning, EDA

Power BI

Dashboard



Structured data science pipeline from raw data to interactive insights.

Made with GAMMA

Peak Hours: 8 AM & 7 PM

Two clear demand surges align with **morning and evening commutes** — critical windows for driver allocation.

Made with GAMMA

Busiest Days: Friday & Saturday

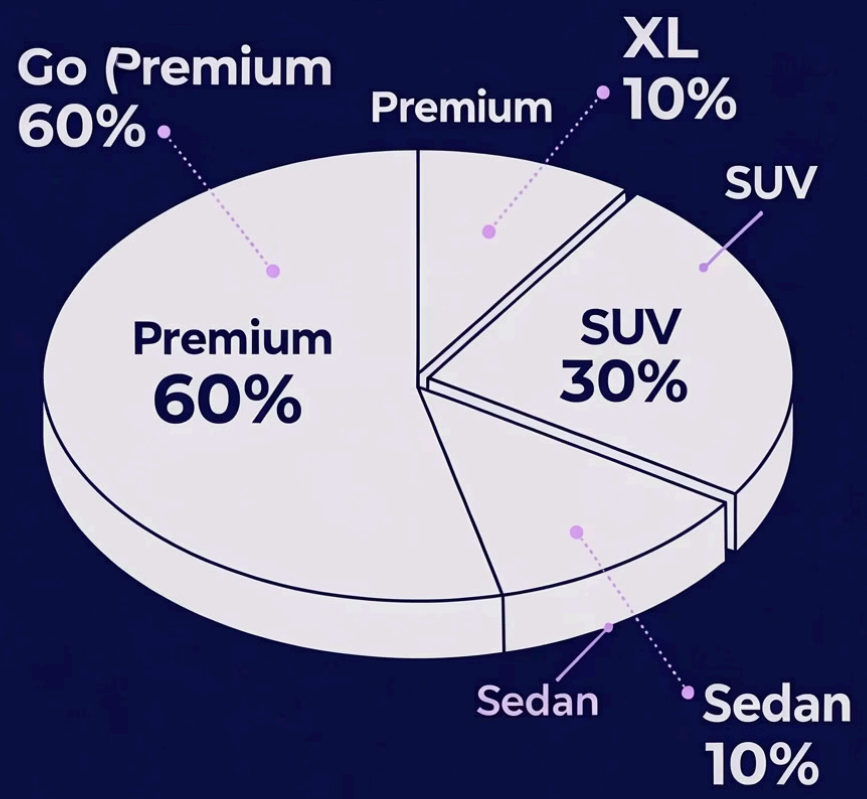
Leisure-Driven Demand

Friday & Saturday top weekly ride volume — signaling **social and leisure travel** over work commutes.

Weekend promotions can maximize engagement during these high-demand days.

Made with GAMMA

Car Type Popularity



'Premium' Dominates

Economy rides account for **60%** of all bookings — strong price sensitivity among riders.

- **SUV & Sedan:** Smaller share, higher margin
- **Opportunity:** Upsell during off-peak hours

Made with GAMMA

Rider Ratings: High Satisfaction

⭐ 4–5 Stars

Most common — positive experience

⚠️ 1–3 Stars

Opportunity to improve service quality

Recommendations

1	**Dynamic Driver Allocation** Incentivize drivers during 7–9 AM & 6–8 PM peaks
2	**Weekend Promotions** "Friday Night" specials to capitalize on leisure demand
3	**Upselling Strategy** Prompt 'Go' users to upgrade to Premier/XL off-peak
4	**Pricing Model Review** Quantify Car Type & Hour impact on fare
